Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers, and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: "Method and Apparatus for Comparing Presenting Price Comparison to Prospective Buyers"

Inventors (please provide full names):  
Chhedi Lal Verma, Manita Ganesan

Earliest Priority Filing Date: 9/11/998

\*For Sequence Searches Only\* Please include all pertinent information (parent, child, divisional, or issued patent numbers) along with the appropriate serial number.

I am looking for an apparatus/method which allows a customer to enter search terms for a desired product. The customer then receives a list of merchants and products so that the customer may compare prices. An important feature of the invention is that the search results also tell the customer which merchants have their respective products in stock so that the customer can go pick up the product in person at the merchant's store. The inventors cite the advantage of preventing merchants from doing "bait-and-switch." Please keep in mind also that the search constraints typically incorporate a local city or zip code since the customer plans to pick up the desired product in person. I feel that there's a lot of reference out there. I'm thinking that there might be such a system which lets <sup>the customer</sup> put a hold on an available product with the intention of picking it up within a given time frame (which is claimed in one of the dependent claims).

Thanks,  
Susie
